PHYSICIAN - PATIENT ARBITRATION AGREEMENT

NOTICE: BY SIGNING THIS CONTRACT YOU ARE AGREEING TO HAVE ANY ISSUE OF MEDICAL MALPRACTICE & OTHER ISSUES DECIDED BY NEUTRAL ARBITRATION AND YOU ARE GIVING UP YOUR RIGHT TO A JURY OR COURT TRIAL.

Article 1: Agreement to Arbitrate: It is understood that any dispute as to medical malpractice or any tort or cause of action between the parties arising from any communication in any form related to services rendered or not rendered and whether any medical services rendered under this contract were unnecessary or unauthorized or were improperly, negligently, or incompetently rendered, will be determined by submission to arbitration as provided by New Jersey law, and not by a lawsuit or resort to court process except as New Jersey law provides for judicial review or arbitration proceedings. Both parties to this contract, by entering into it, are giving up their constitutional rights to have any such dispute decided on a court of law before a jury, and instead are accepting the use of arbitration.

Article 2: All Claims Must be Arbitrated: It is the intention of the parties that this agreement bind all parties whose claims may arise out of or related to treatment or service provided or not provided or communications made between the parties in any form (in person, over phone, text message, fax, email etc.), including any family or heirs of the patient and the term "patient" herein shall mean the mother and the mother's expected child or children.

All claims for monetary damages exceeding the jurisdictional limit of the small claims court and all class action cases against the physician, and the physician's partners, associates, association, corporation or partnership, and the employees, agents and estates of any if them, must be resolved by means of binding arbitration before a single arbitrator in accordance with the then existing Commercial Arbitration Rules of the American Arbitration Association, including the Optional Rules for Emergency Measures of Protection. The arbitrator shall be a practicing attorney or retired judge with at least fifteen years total working experience as such. The arbitration shall be held in New Jersey or any other place agreed upon at the time by the parties. No demand for arbitration may be made after the date when the institution of legal or equitable proceedings based on such claim or dispute would be barred by the applicable statute of limitation. The arbitrator is not authorized to award punitive or other damages not measured by the prevailing party's actual damages.

A party may apply to the arbitrator seeking injunctive relief until an arbitration award is rendered or the dispute is otherwise resolved. A party also may, without waiving any other remedy, seek from any court having jurisdiction any interim or provisional relief that is necessary to protect the rights or property of that party pending the arbitrator's appointment or decision on the merits of the dispute. If the arbitrator determines that a party has generally prevailed in the arbitration proceeding, then the arbitrator shall award to that party its reasonable out-of-pocket expenses related to the arbitration, including filing fees, arbitrator compensation, attorney's fees and legal costs.

Article 3: Procedures and Applicable Law: A demand for arbitration must communicate in writing to all parties. Each party shall select an arbitrator (party arbitrator) within thirty days and a third arbitrator (neutral arbitrator) shall be selected by the arbitrators appointed by the parties within thirty days of a demand for a neutral arbitrator by either party. Each party to the arbitration shall pay such party's pro rata share of the expenses and fees of the neutral arbitrator, together with other expenses of the arbitration incurred or approved by the neutral arbitrator, not including counsel fees or witness fees, or other expenses incurred by a party for such party's own benefit.

Either party shall have the absolute right to arbitrate separately the issues of liability and damages upon written request to the neutral arbitrator. The parties consent to the intervention and joinder in this arbitration of any person or entity which would otherwise be a proper additional party in a court action, and upon such intervention and joinder any existing court action against such additional person or entity shall be stayed pending arbitration.

Article 4: Revocation: This agreement may be revoked by written notice delivered to the New Age Medical Clinic PA within 30 days of signing.

Article 5: Retroactive Effect: If patient intends this agreement to cover services rendered before the date it is Effective as of the date of first contact with patient.

AGREED to Article 5: **X** _____
PATIENT SIGNATURE

Article 6: Severability Provision: If any provision if this arbitration agreement is held invalid of unenforceable, the remaining provisions shall remain in full force and shall not be affected by the invalidity of any other provision.

I understand that I have the right to receive a copy of this arbitration agreement. By my signature below, I acknowledge that I have received a copy.

COLONIC PATIENTS ONLY

NEW AGE MEDICAL CLINIC PA does NOT treat diseases and any services performed by staff, are designed to improve overall wellbeing of our patients.

Patient agrees to consult with primary care physicians as to the safety and efficacy of the treatments provided by staff at NEW AGE MEDICAL CLINIC PA given their familiarity with patient's underlying medical history and response to medications received. Patient has not been pressured to make any decision and I have had the opportunity to discuss all treatments proposed with my primary care physician and given the opportunity to ask questions.

Patient confirm they are making an informed decision based on all the information provided by NEW AGE MEDICAL CLINIC PA and my primary healthcare practioner(s) and I have had the opportunity to review any peer reviewed scientific journals that may have reported on the therapies proposed. Such journals can be reviewed for free at UMDNJ Library 30 12th Ave. Newark NJ, 07101, Phone: 973-972-4580 or accessed by subscribing online at <http://www.questia.com>

Treatments may have risk factors listed or cause the side effects listed below. However, as these treatments may not have been funded for widespread scientific review under controlled conditions and have not been reported in peer reviewed scientific journals; there may be some side effects that we cannot predict.

- The patient's diagnosis, if known: **constipation | bloating | heart burn / acid reflux | gas | abdominal pain | bad breath | acne | (other)**_____
- The nature and purpose of a proposed treatment or procedure: Colonic (Colon Hydrotherapy)
- The benefits of a proposed treatment or procedure: Relief of Constipation, gas, bloating and accumulated fecal material and possible improvement of atrophy of colon muscle.
- Alternatives (regardless of their cost or the extent to which the treatment options are covered by health insurance): laxatives, increase fiber, change diet
- The risks of not receiving or undergoing a treatment or procedure: stay the same or get worse
- The benefits of not receiving or undergoing a treatment or procedure: save money or condition may resolve itself

Colonics: Side effects / Potential risks or discomfort: abdominal cramping if severely impacted, fluid overload if patient has history of uncontrolled hypertension or heart failure, intestinal perforation if patient has had recent colon surgery or bleeding

DO YOU HAVE or HAVE YOU EVER BEEN DIAGNOSED WITH:

I _____ (patient name) acknowledge and understand that DR. Maria Romanenko, DO/ New Age Medical Clinic PA (hereafter "Medical Clinic") is NOT my primary Medical Doctor and ALL medical decisions regarding any current or future health conditions should be addressed by my primary care physician. I have spoken to my primary care physician regarding the services I am seeking and he/she has no objections to my starting B12 Shots & MIC Lipotropic SHOTS. Medical Clinic serves as only a resource for general wellbeing and preventive medicine and does NOT treat any existing illness.

I acknowledge that there are no guarantees relating to the effectiveness of the B12 Shots & MIC Lipotropic SHOTS and that I have done my own research and have made a well informed decision to B12 Shots & MIC Lipotropic SHOTS and agree that Medical Clinic is not responsible for my individual performance or my ability to adhere to the diet. There are NO guarantees for individual weight loss or any other benefits.

In fact, I acknowledge that I have done my own research and am requesting that the Medical Clinic provide the B12 Shots & MIC Lipotropic SHOTS to me. I am fully informed of costs, risks and alternatives. I acknowledge that any medical ailments or personal issues preventing adherence to taking the B12 Shots & MIC Lipotropic SHOTS is not the fault or responsibility of Medical Clinic.

I fully understand that there is NO medical necessity to take MIC Lipotropic or B12 shots and that there are many alternatives that are less costly such as eating well balanced meals or taking oral supplements.

I agree that I will NOT to share any prescribed medications with any friends or family as doing such may be PRACTICING MEDICINE WITHOUT A LICENSE a crime in New Jersey.

I UNDERSTAND THERE ARE NO REFUNDS OR PARTIAL CREDITS FOR ANY REASON.

I request treatment with B12 or MIC-B12. The injection of B12 and MIC-B12 has been explained to me and my questions regarding such treatment have been answered to my satisfaction. The information given to me has been in clear terms and I understand the risks, benefits, possible side effects and complications of the treatment.

I UNDERSTAND THE RECOMMENDED DOSE FOR B12 IS 1ML INTRAMUSCULAR WEEKLY. Patient Initial **X** _____

I UNDERSTAND THE RECOMMENDED DOSE FOR MIC-B12 IS 1 TO 2 ML INTRAMUSCULAR OR SUBCUTANEOUSLY WEEKLY. (A DOSE OF 1 MLS AT BEGINNING OF WEEK, THEN A DOSE OF 1 MLS 3 DAYS LATER) Patient Initial **X** _____

I CERTIFY THAT I DO NOT HAVE AN ALLERGY TO SULFA. Patient Initial **X** _____

I CERTIFY THAT I DO NOT HAVE A LIVER OR KIDNEY IMPAIRMENT THAT I AM AWARE OF. Patient Initial **X** _____

Vitamin B-12 helps maintain good health and has been shown to be beneficial in helping to: Reduce stress, fatigue, improve memory and cardiovascular health, and maintain a good body weight. It can also assist the body in converting proteins, fats and carbohydrates into energy and is necessary for healthy skin and eyes.

B12 Injections are better absorbed by the body since they go directly into the blood stream. Alternatives to B12 injections are Oral Vitamins, B12 Patch, Lozenges, Liquid drops and Nasal Spray

B12 / MIC (Lipotropic) Injections common side effects include but are not limited to:

1. Risks: I understand there is risk of mild diarrhea, upset stomach, nausea, a feeling of pain and a warm sensation at the site of the injection, a feeling, or a sense, of being swollen over the entire body, headache and joint pain
2. If any of these side effects become severe or troublesome I will contact my physician immediately
3. I understand that although rare Vitamin B12 or MIC injections can result in serious side effects. Although this is a relatively rare occurrence, anyone taking vitamin B12 or MIC injections should be aware of the possibility. Uncommon side effects are much more serious than the common side effects of B12 or MIC injections, and such side effects should be reported to a physician to be evaluated for seriousness. Uncommon and dangerous side effects include:

X _____
PATIENT Signature

STAFF Signature

- rapid heartbeat
 - chest pain
 - flushed face
 - muscle cramps and weakness
 - difficulty breathing and swallowing
 - dizziness
 - confusion
 - rapid weight gain
 - tight feelings in the chest
 - hives, skin rashes
 - shortness of breath when there is no physical exertion and unusual wheezing and coughing.
4. Before starting vitamin B12 / MIC injections I will make sure to tell my Physician if I am pregnant, lactating or have any of the following conditions.
- Leber's Disease
 - Kidney disease
 - Liver disease
 - An infection
 - Iron deficiency
 - Folic acid deficiency
 - Receiving any treatment that has an effect on bone marrow
 - Taking any medication that has an effect on bone marrow
 - An allergy to cobalt or any other medication, vitamin, dye, food or preservative
5. I understand that certain herbal products, vitamins, minerals, nutritional supplements, prescription and non prescription medications may result in side effects when they interact with the B12 Injection.
6. B12 Treatments: Once a week / MIC LIPOTROPIC with B12 once or twice per week.

I have been informed of the following:

- While all components generally have no side effects, doses must be taken at regular intervals. The injections are only effective temporarily. As soon as the effect of these drugs wear out, the body starts returning to normal.
- Some redness, minor discomfort, small bruising and bleeding at the injection site may occur. This will usually dissipate in a minimal amount of time.
- Some people have experienced allergic reactions to the injections.
- Potential side effects include stomach upset and urinary problems due to the strain the injections place on the kidneys. Some patients have been unable to control their urine and/or had diarrhea.
- Depression is another possible side effect.
- It has been reported that B12 can cause peripheral vascular thrombosis, itching, and a feeling of swelling in the body.
- Unexplained pain may develop in unrelated parts of the body. Some people have experienced joint pains.
- Lipotropic injections change the function of the digestive system temporarily. This can result in extreme exhaustion.
- Weight loss can be inconsistent from one week to the next. There can be no guarantees as to the timetable of a weight loss program.
- Too much Methionine and Adenosine Monophosphate can potentially accumulate in the body and have the side effect of boosting the metabolic rate too high. If any abnormal heart racing occurs, I will contact my medical provider immediately.
- Vitamin B12 is contraindicated in Leber's hereditary optic neuritis, as it can cause blindness.

I understand that there is limited research and established clinical research with scientific studies to support safe use of B12 and or MIC Lipotropic Injections and that I may have unexpected negative results and that I have fully discussed this possibility with my primary care physician and I am willing to assume the risks.

I will inform my practitioner of any changes in my medical history, current medications, and/or any changes relevant to this procedure prior to any future treatments.

X

I _____(hereafter "PATIENT") acknowledge and understand that DR. Maria Romanenko, DO/ New Age Medical Clinic PA (hereafter "Medical Clinic") is NOT my primary Medical Doctor and ALL medical decisions regarding any current or future health conditions should be addressed by my primary care physician. I have spoken to my primary care physician regarding the HCG Diet and he/she has no objections to my starting the program. Medical Clinic serves as only a resource for general wellbeing and preventive medicine and does NOT treat any existing illness.

I acknowledge that there are no guarantees relating to the effectiveness of the HCG Diet and that I have done my own research and have made a well informed decision to start the diet and agree that Medical Clinic is not responsible for my individual performance or my ability to adhere to the diet. There are NO guarantees for individual weight loss. No promises have been made that I will lose a particular amount of weight and I have done my own research about the HCG Diet and I assume responsibility for my performance.

I acknowledge that I have done my own research independent of Medical Clinic and am requesting that the Medical Clinic provide the HCG Diet to me and I assume complete responsibility for my performance. I am fully informed of costs, risks and alternatives. I acknowledge that Medical Clinic did not invent the HCG Diet and it is one of many clinics providing such service and my decision to do the HCG Diet is not based on any pressure from Medical Clinic.

I agree that ONCE I START THE DIET IT LASTS FOR ONLY 4 week, 6 week, 8 weeks from day I start diet. (depending on what I sign up for). THE DIET STARTS THE FIRST DAY OF THE FIRST INJECTION AND IS OVER 25 or 40 DAYS FROM THAT DATE! IF I STOP FOR ANY REASON THE DIET IS OVER WHEN THE 4 week, 6 week, 8 weeks PERIOD FOR WHICH I SIGNED UP REACHES 4 week, 6 week, 8 weeks FROM START DATE. DOING ½ the diet and resuming diet after stopping for more than one week is NOT permitted and that any additional monitoring required might incur an additional charge. Patient agrees he/she will not SPLIT diet into multiple diets.

I am certain I'll be ready to start diet when I start it. I acknowledge that any medical ailments or personal issues preventing adherence to diet is not the fault or responsibility of Medical Clinic. I understand **Insurance does NOT cover the HCG Diet** and that New Age Medical Clinic will not submit any receipts on my behalf.

I agree that I will NOT to share any prescribed medications with any friends or family as doing such may be PRACTICING MEDICINE WITHOUT A LICENSE and is a crime in New Jersey.

NO PROMISES HAVE BEEN MADE TO PATIENT FOR WEIGHT LOSS!

Patient acknowledges they are 1) above average intelligence 2) have no pending medical issue pressuring them into trying our services 3) have independently researched services they are receiving 4) have not been pressured into purchasing our services 5) can afford to pay for services without negatively affecting their lifestyle or anyone's wellbeing who depends upon them financially 6) they have independently reviewed services they are purchasing with their Primary Care Physician and that Physician has no objections with their participation in such services.

NEW AGE MEDICAL CLINIC PA DID NOT INVENT HCG DIET!! PATIENT HAS EVALUATED OTHER HCG DIET PROVIDERS AND CHOSE OUR OFFICE AFTER THOROUGHLY RESEARCHING THE DIET PROGRAM!

I UNDERSTAND THERE ARE NO REFUNDS OR PARTIAL CREDITS FOR ANY REASON.

PATIENT AGREES TO TEXT OR CALL OFFICE EVERY SINGLE DAY HE/SHE DOES NOT LOSE A POUND.

NO EXPECTATION HAS BEEN GIVEN THAT PATIENT WILL LOSE A POUND PER DAY!! THAT IS OUR GOAL BUT NOT PROMISES HAVE BEEN MADE TO PATIENT!!

STAFF Signature

Maria Romanenko, DO/ New Age Medical Clinic PA (hereafter "Medical Clinic") does NOT treat any diseases and any services performed by staff, are designed to improve overall nutritional wellbeing of our patients. **The HCG Diet requires daily injections to be administered to patient. No published studies have shown that the HCG Diet is effective. HCG has not been approved by FDA for weight loss.**

Since 1975 the FDA has required all marketing and advertising of HCG to state the following: **"HCG has not been demonstrated to be effective adjunctive therapy in the treatment of obesity. There is no substantial evidence that it increases weight loss beyond that resulting from caloric restriction, that it causes a more attractive or 'normal' distribution of fat, or that it decreases the hunger and discomfort associated with calorie-restricted diets."**

"HCG is a hormone extracted from urine of pregnant women. It is approved by FDA for treatment of certain problems of the male reproductive system and in stimulating ovulation in women who have had difficulty becoming pregnant. No evidence has been presented, however, to substantiate claims for HCG as a weight-loss aid."

Patient agrees to consult with primary care physicians as to the safety and efficacy of the treatments provided by staff at Medical Clinic given their familiarity with patient's underlying medical history and response to medications received. Patient has not been pressured to make any decision and I have had the opportunity to **discuss all treatments proposed with my primary care physician** and given the opportunity to ask questions.

Patient confirms he/she is making an informed decision based on all the information provided by Medical Clinic and my primary healthcare practioner(s) and I have had the opportunity to review any peer reviewed scientific journals that may have reported on the therapies proposed. Such journals can be reviewed for free at UMDNJ Library 30 12th Ave. Newark NJ, 07101, Phone: 973-972-4580 or accessed by subscribing online at <http://www.questia.com>

Treatments may have risk factors listed or cause the side effects listed below. However, as **these treatments might be considered experimental in nature**, as they may not have been funded for widespread scientific review under controlled conditions and have not been reported in peer reviewed scientific journals; there may be some side effects that we cannot predict.

WOMEN of Child Bearing Years: I certify that there is NO possible way that I could be pregnant. Women in child bearing years must receive pregnancy test (\$20 extra) if they have had sexual intercourse since last menstrual period unless they have had a hysterectomy. I agree that I will avoid unprotected sex and use multiple methods of birth control during the time frame while on HCG Diet. **MEN** agree to not have unprotected sex and not attempt to conceive children until 60 days after completing HCG DIET. (Patient Initial)_____

The patient's diagnosis, if known: _____ **obesity** | _____ **over weight** | _____ **(other)**

- The nature and purpose of a proposed treatment or procedure: **Hcg Diet**
- The benefits of a proposed treatment or procedure: **Weight Loss**
- Alternatives (regardless of their cost or the extent to which the treatment options are covered by health insurance): **change diet, exercise, prescribed medication, OTC medications, surgery, psychiatric therapies**
- The risks of not receiving or undergoing a treatment or procedure: **stay the same or get worse**
- The benefits of not receiving or undergoing a treatment or procedure: **save money or condition may resolve itself**

HCG Diet: Side effects / Potential risks or discomfort: REMEMBER: ALL WOMEN WHO GET PREGNANT HAVE HAD HCG IN THEIR BODY AT FAR HIGHER LEVELS THAN THOSE TAKING HCG AS PART OF THE HCG DIET. Dehydration is common side effect of HCG Diet. Hair loss is a rare side effect of dieting especially with highly restrictive diets. Take supplements and consult your primary care MD if you have a history of hair loss. The HCG medication manufacturer reports that on rare occasions some patients taking HCG at HIGH levels 10,000+ I.U.'s (50 times the HCG Diet Dosage) may experience headaches, mood swings, depression, blood clots, confusion, and dizziness. Some women also develop a condition called Ovarian Hyperstimulation Syndrome (OHSS); symptoms of this include pelvic pain, swelling of the hands and legs, stomach pain, weight gain, shortness of breath, diarrhea, vomiting/nausea, and/or urinating less than normal. In some women, being on the HCG diet protocol and taking HCG, may cause delayed menstrual cycle, early menstrual cycle, heavier flow, lighter flow and or heavy cramping. These conditions also are symptoms that women may experience during pregnancy.

INFORMED CONSENT FOR GROWTH HORMONE PEPTIDES & HORMONES TREATMENT AND RELEASE AGREEMENT

I _____ hereby consent to be evaluated and treated by Dr. Maria Romanenko, D.O. and NEW AGE MEDICAL CLINIC PA with the objective of preventive medicine and improvement in existing medical symptoms and no guarantees can be made that such treatments will improve existing medical conditions. The recommended treatments and therapies may include nutritional guidance, administration of nutraceuticals (a combination of nutrient and pharmaceutical), and hormone replacement therapy for hormone deficiencies. I understand the treatment regimen will likely involve the administration of nutraceuticals and hormones, including growth hormone releasing hormones and peptides. I understand that Dr. Maria Romanenko, D.O. may be assisted by other healthcare professionals, as necessary, and agree to their participation in my care as it relates to nutraceuticals, nutrition, and hormone replacement therapy. I make this decision to participate in this treatment without any pressure from Dr. Maria Romanenko, D.O. or NEW AGE MEDICAL CLINIC PA staff.

Reactions to Sermorelin Acetate / Growth Hormone Releasing Peptide Therapy

As is the case with the administration of any Hormone Replacement Therapy, systemic or local allergic responses can sometimes result. It is vital that patient (and parent if applicable) be aware that such responses can potentially occur. If the patient suffers an allergic reaction as a result of **Sermorelin Acetate / Growth Hormone Releasing Peptide Therapy** it is vital that they receive medical attention promptly.

Clinical Tests have shown that increased blood-serum levels of Insulin-Like Growth Factor One (IGF-1), Human Growth Hormone, alkaline phosphatase, and inorganic mineral phosphorus can occur as a result of **Sermorelin Acetate / Growth Hormone Releasing Peptide Therapy**.

Drug Interactions

Taking glucocorticoid steroids in combination with **Sermorelin Acetate / Growth Hormone Releasing Peptide Therapy** maybe reduce the effectiveness of Therapy. In clinical studies of **Sermorelin Acetate / Growth Hormone Releasing Peptide Therapy** no evidence has been discovered, it is still important to note that their have been no clinical studies regarding formal medical interactions.

Fertility Impairment, Mutagenesis, Cancer risk

There has been no longitudinal animal research regarding fertility impairment or carcinogenicity risk regarding **Sermorelin Acetate / Growth Hormone Releasing Peptide Therapy**. There has been absolutely no clinical research linking **Sermorelin Acetate / Growth Hormone Releasing Peptide Therapy** to genetic abnormalities.

Pregnancy

There has been some animal research conducted regarding **Sermorelin Acetate / Growth Hormone Releasing Peptide Therapy**. At a dosage somewhere between three and six times the normal daily dosage that a human patient receives adjusted for physical surface area, minor fetal changes occurred in rabbits and rats. There have been no adequately controlled studies regarding the usage of **Sermorelin Acetate / Growth Hormone Releasing Peptide Therapy** by women who are pregnant. **Sermorelin Acetate / Growth Hormone Releasing Peptide Therapy** should NOT be administered to women that are pregnant. I certify there is no way I can be pregnant.

Nursing Women

It is unknown if **Sermorelin Acetate / Growth Hormone Releasing Peptide** is produced in human milk. There are many medications that are released by the mother in the nursing process, and for this reason mothers and physicians should exercise caution when using **Sermorelin Acetate / Growth Hormone Releasing Peptide Therapy** while nursing.

Disposal Information

If the physician approves home usage, the patient should use SHARPS containers meant for the proper disposal of used needles and syringes accumulated as a result of Sermorelin Acetate / Growth Hormone Releasing Peptide Therapy. These containers are puncture resistant and are a necessary safety measure to protect both patient and anyone who may come in contact with the used needles and syringes. It is vital that patient (and parent, if applicable) be directed thoroughly as to the vital important of proper needle disposal. Also, they should be informed of the dangers of reusing syringes and needles as well.

Side Effects

A significant portion of Sermorelin Acetate / Growth Hormone Releasing Peptide Therapy patients develop antibodies against Growth Hormone Factor during at least one point of therapy. There is no clear assessment of the significance of the presence of these antibodies, and the levels of these antibodies can change quickly from test to test. A positive result at one juncture regularly turns into a negative result after the next test. The production of these antibodies does not seem to have any adverse effect on the patient. Also, these antibodies do not seem to produce any change in the effectiveness of Sermorelin Acetate / Growth Hormone Releasing Peptide Therapy. There have been no reported general allergic responses to Sermorelin Acetate / Growth Hormone Releasing Peptide Therapy.

The most common reaction to Sermorelin Acetate / Growth Hormone Releasing Peptide Therapy which is related to treatment is local irritation around the injection site, which occurs in around one of every six patients. This irritation is characterized by redness, pain, or swelling. Though this side effect is relatively common, only a small minority of patients find the irritation bothersome enough to suspend therapy. Out of a sample of 350 patients who underwent Sermorelin Acetate / Growth Hormone Releasing Peptide Therapy in clinical trial, only three suspended therapy as a result of injection-site irritation. There are other side effects which occurred in less than one percent of patients. These side effects include: severe drowsiness, hives, vomiting, headache, nausea, difficulty swallowing, hyperactivity, chest tightness and pallor, distortion in perception of taste, and flushing of the skin.

Sermorelin Acetate / Growth Hormone Releasing Peptide Therapy Dependency and Abuse

There is no evidence to suggest that the use of Sermorelin Acetate / Growth Hormone Releasing Peptide Therapy for any period of time will result in any sort of dependency or proclivity toward abuse. The general pharmacology of Sermorelin Acetate / Growth Hormone Releasing Peptide Therapy does not produce any addictive effect, and clinical trials have produced no evidence of such an effect.

Never Take More than Prescribed

It is not recommended to exceed the recommended dosage of Sermorelin Acetate / Growth Hormone Releasing Peptide Therapy prescribed by your physician. Overdose will not provide better results. It will only increase the occurrence of side effects.

Hormone Therapy

While hormones can be administered by applying creams to the skin, I understand that some hormone therapies (typically require one subcutaneous injections (that is syringe injections - "shots" under the first few layers of skin) per day. I understand there are certain risks associated with this procedure. The risks include; (1) water retention which may result in leg swelling; (2) elevated blood pressure, which may be reversed with dose adjustment; (3) an initial mild increase in fasting blood sugar (if I am diabetic); (4) bruises at the injection site; and (5) infection at the injection site if improper techniques are used. By agreeing to undergo this therapy I accept these risks and freely agree to participate in this type of hormone therapy.

I understand the possible benefits of hormone therapy can include: controlling or stopping menopause or andropause symptoms; improving my physical and mental shape; increased energy; decreased wrinkles; losing weight; an improved sex life; and sleeping more soundly. Also, I have been counseled by Dr. Maria Romanenko, D.O. and other staff of NEW AGE MEDICAL CLINIC PA about hormone therapy.

Human Growth Hormone can affect cell metabolism and cell growth. For example, if a patient had an underlying and/or undetected cancerous growth prior to undergoing hormone therapy, the administration Sermorelin or other hormones could possibly induce further growth of the underlying cancer. Some studies contradict this theory but results are unknown.

All questions I had regarding hormone replacement therapy have been answered to my satisfaction. I understand that I will be responsible for injecting and administering any hormones prescribed to me. I agree to conform and comply with the recommended doses and methods of administration. I also agree to comply with requests for initial and subsequent blood tests, as required, to monitor my hormone levels.

Off-Label Use of FDA-Approved Drugs

I also understand that hormone replacement therapy may include the "off-label" use of FDA-approved drugs. "Off-label use" means an FDA-approved drug is used in therapies and treatments for which the drug was not specifically approved. As much as forty-six per cent

Print Patient Name

Patient Signature Date Witness/ Staff Member

(46%) of certain classes of prescriptions are for off-label use of FDA-approved drugs. The reasonable alternatives to hormone replacement therapy have been explained to me and they include: (1) leaving the hormone levels as they are; and (2) treating diseases as they appear.

Informed Consent

I understand that no guarantee has been made to me regarding the outcome of the Neutraceutical, Antioxitant, or Hormone therapies. I also understand that the benefits derived from these therapies will stop if the therapies are discontinued.

In addition, I assume full liability for any adverse effect that may result from the non-negligent prescribing of the Neutraceuticals, Antioxitants, Hormones, Drugs, or other treatments involved in the therapies and medical care prescribed or recommended by Dr. Maria Romanenko, D.O. and NEW AGE MEDICAL CLINIC PA, and I release her from any and all claims (legal or otherwise), grievances, or damages (monetary or otherwise) arising from my treatment as her patient.

I hereby confirm and attest that I am not under the jurisdiction of any governing body with prohibits the use of hormone and/or human growth hormone replacement therapy, such as sports organizations, competitive athletic/bodybuilding organizations, Olympic sports teams, or the like.

I certify that I am under the care of another physician or physicians for all other medical conditions. I will consult with this or these physician(s) for any other medical services I may require. I understand that Dr. Maria Romanenko, D.O. and NEW AGE MEDICAL CLINIC PA 's practice is specialized and that she is NOT my primary care physician. I agree that I will continue under the active care of my other physician(s) for any medical condition and medical consultations that I may need. I understand that this clinic will not prepare insurance claim forms for me.

I hereby understand, agree, and confirm that the therapies and treatments recommended by Dr. Maria Romanenko, D.O. and NEW AGE MEDICAL CLINIC PA are elective. The risks involved and the possibilities of complications have been explained to me. I understand that any prescribed therapies and treatments are based on the medical judgment of Dr. Maria Romanenko, D.O. and NEW AGE MEDICAL CLINIC PA based on her expertise in this field of medicine. I understand that I may suspend or terminate treatment at any time, and I hereby agree to immediately notify Dr. Maria Romanenko, D.O. and NEW AGE MEDICAL CLINIC PA of any such suspension or termination. To attest to my consent to this treatment regimen and the releases stated above, I hereby sign this authorization for treatment.

I have spoken to my primary care physician regarding Sermorelin Acetate / Growth Hormone Releasing Peptide Therapy and he/she has no objections to my starting the program.

I acknowledge that there are no guarantees relating to the effectiveness of Sermorelin Acetate / Growth Hormone Releasing Peptide Therapy and that I have done my own research and have made a well informed decision to start the treatment and agree that NEW AGE MEDICAL CLINIC PA and staff are not responsible for my individual performance or my ability to adhere to the program. There are NO guarantees and there are NO REFUNDS.

In fact, I acknowledge that I have done my own research and am requesting that the NEW AGE MEDICAL CLINIC PA provide Sermorelin Acetate / Growth Hormone Releasing Peptide Therapy to me.

I am certain I'll be ready to start Sermorelin Acetate / Growth Hormone Releasing Peptide Therapy when I start it. I acknowledge that any medical ailments or personal issues preventing adherence to complete the therapy is not the fault or responsibility of Maria Romanenko, D.O. or NEW AGE MEDICAL CLINIC PA

Risks: INFECTION, ANTIBODY PRODUCTION (REDNESS AND SWELLING IN AREA OF INJECTION) ADDITIONAL UNKNOWN RISKS

Potential Benefits of short- and long-term treatment: IMPROVED OVERALL HEALTH

Less-intrusive alternatives: EXERCISE & IMPROVED NUTRITION

The consequences of the cessation of treatment: NO KNOWN CONSEQUENCES OF DISCONTINUING TREATMENT

Financial costs associated with treatment: Sermorelin \$650 per month

Blood work required: Men: CBC, BMP, IGF-1, PSA / Women: CBC, BMP, IGF-1, PREGNANCY

Followup Required: Monthly office visits with physical exam and interview of experience

Conditions We Treat With Sermorelin Acetate (Growth Hormone Releasing Hormone and Peptides):

Negative changes in memory, processing speed and attention, Lack of well-being, Depression, Anxiety, Social isolation, Fatigue, Lack of strength, Fibromyalgia syndrome, Neuromuscular dysfunction, Central adiposity (increased fat around abdomen), Decreased muscle mass, Decreased bone density, Impaired cardiac function, Decreased insulin sensitivity (elevated blood sugar) Increased low-density lipoprotein (bad cholesterol), Prothrombotic state (easily develop clots), Decreased sweating and thermoregulation (feeling hot / cold).

We do not prescribe, order, dispense, administer, sell, or transfer sermorelin or GHRP-2 to any person for the purpose of hormonal manipulation intended to increase muscle mass, strength, stamina, or weight; nor for use for body building, muscle enhancement, or increasing muscle bulk or strength by a person in good health for the intended purpose of improving performance in any form of exercise, sport, or game.

No Refunds given for packages purchased. If credit needs to be given for medical reason or unavailability of medication or other unforeseen reason credit to be given after deduction of full regular pricing of months already supplied to patient. Credits can be used for any other services provided by New Age Medical Clinic PA. ie: Patient receives three months supplies and gets pregnant and can not continue: refund will be minus \$650 per month (or regular pricing at time of purchase) x three months from package purchase price.

Informed Consent IV Vitamins, IV Vitamin C & IV minerals

Print Patient Name _____ Age _____ Date _____

New Age Medical Clinic PA / Dr. Maria Romanenko, DO does NOT treat diseases and any services performed by staff / treatments received by patients, are designed to improve overall nutritional wellbeing of our patients.

Patient agrees to consult with primary care physicians as to the safety and efficacy of the treatments provided by staff at New Age Medical Clinic PA / Dr. Maria Romanenko, DO given their familiarity with patient’s underlying medical history and response to medications received.

Patient understands that the treatments provided by staff at New Age Medical Clinic PA / Dr. Maria Romanenko, DO are experimental in nature as there is not significant peer reviewed medical literature supporting the use of such therapies.

Patient acknowledges that I have not been pressured to make any decision and have had the opportunity to discuss all treatments proposed with my primary care physician and given the opportunity to ask questions.

Patient has made an informed decision based on all the information provided by the New Age Medical Clinic PA / Dr. Maria Romanenko, DO & Staff and with consultation with primary care physician and has had the opportunity to review any peer reviewed scientific journals that may have reported on the therapies proposed. Such journals can be reviewed for free at UMDNJ Library 30 12th Ave. Newark NJ, 07101, Phone: 973-972-4580 or accessed by subscribing online at <http://www.questia.com>.

I understand that IV Vitamin C therapy is considered controversial for the generalized treatment of cancer, viruses and other degenerative diseases, and a minority of the medical community accepts the view that it is of benefit in the treatment of such disorders. Opponents consider such use of IV Vitamin C therapy to be “experimental.” New Age Medical strongly opposes me utilizing such treatments in place of traditional treatments.

WOMEN of Child Bearing Years:

I certify that there is NO possible way that I could be pregnant X_____ (women in child bearing years must receive pregnancy test if they have had sexual intercourse since last menstrual period unless they have had a hysterectomy.)

I agree that I will either refrain from sexual intercourse during heavy metal detoxification and for 60 days since last treatment or take precautionary measures with birth control during this time frame. X_____

Treatments may cause the side effects listed below as well as others. However, as these treatments are experimental in nature, as they may not have been funded for widespread scientific review under controlled conditions and have not been reported in peer reviewed scientific journals; there may be some side effects that we cannot predict.

Side effects / Potential risks:

Inflammation of a vein:

If an infusion into a vein is performed too rapidly, inflammation may occur. X_____ (patient initials)

Infection is possible if patient has immune compromise or by unexplained introduction of pathogen or existing infection in patient worsening. X_____ (patient initials)

If you have history of Congestive heart failure or uncontrolled hypertension:

If the heart is already unable to cope adequately with the movement of fluids or there is evidence of congestive heart failure (extreme shortness of breath, swollen ankles) patient should avoid excess fluids as it could increase the fluid retention tendency. I certify I have NOT been diagnosed with congestive heart failure X_____ (patient initials)

The patient’s diagnosis, if known: trace amounts of heavy metals | atherosclerosis | claudication | preventive medicine | high blood pressure | diabetes | (other)_____

Patient acknowledges that they were informed WE DO NOT CLAIM TO CURE ANY DISEASE X _____(patient initials)

The nature and purpose of a proposed treatment or procedure: IV vitamins, IV mineral, and IV antioxidant (glutathione) supplements.

The possible but NO DEFINITE benefits of a proposed treatment or procedure: not certain | possible reversal of disease | prevention of disease | improved general wellbeing.

- **Alternatives (regardless of their cost or the extent to which the treatment options are covered by health insurance):** healthy eating | surgery | do nothing | consult experts | Radiation | Chemotherapy | _____
- **The risks of not receiving or undergoing a treatment or procedure:** stay the same | get worse | possibly none
- **The benefits of not receiving or undergoing a treatment or procedure:** save money | condition may resolve itself
